BRICS vs GraphBPE — 44,328 matched molecules
Fragment counts (one fragment = one counting token)
(a) Log–log scale distribution
BRICS
BRICS median: 5
GraphBPE
GraphBPE median: 5
Density
Number of fragment tokens
(b) Complementary CDF (log–log)
BRICS
GraphBPE
Tail probability $P(X \geq x)$
Number of fragment tokens
(c) Rank–frequency plot
BRICS
GraphBPE
Molecules with that length
Rank of token-length frequency
(d) Linear–log with percentiles
BRICS
GraphBPE
BRICS: P95=12, P99=29
GraphBPE: P95=22, P99=38
Density (log scale)
Number of fragment tokens
